Lighting Solutions

NWC Four channel RGBW Controller

The NWC Four channel RGBW controller is ideal for electricians and professionals looking to create impressive lighting solutions. It can be used in everything from home environments to professional installations, where flexibility and quality are essential.

With its unique four-channel output, this controller can provide independent dimming and color adjustment for both RGB and white lighting. It offers input polarity protection and overload protection, ensuring reliable operation. The controller functions both independently and alongside other Norlux Wireless Connect devices, providing great versatility in its use.

The product has an IP rating of IP20.
