Global Pulse Track Recessed

Global Pulse Track Recessed

The recessed version of GLOBAL Trac Pulse for suspended ceilings. GLOBAL Trac Pulse control is a lighting track system that includes both normal input voltage and wires for transmitting the control signal to the lights. This makes it possible to use smart control systems without central units. Of these, the DALI, DMX, LON and EIB standards are the most widely known. Various manufacturers provide control units, detectors and fixtures for the control systems. All control systems share the same goal: to transmit the control signal to individual lights using the GLOBAL Trac Pulse controls wires and to create dynamic lighting.

VERSIONS

Art.No	Color	Length [mm]	Circuit	Voltage	Pull strength [N]
