

Heatmiser neoStat v.2 WH

230V
50Hz

Heatmiser neoStat v2 is a programmable thermostat with illuminated touch buttons. You can configure the unit to work as a thermostat or as a timer. The Neo -series provides a lot of options and if you connect the thermostat to the neoHub (sold separately), you can control the average temperature in a larger room as an example. You can also turn off the heating automatically every time you open a door or a window. Connect all of your units through the wireless mesh-network.
