

## Ufo U - Microwave Sensor

Max mounting height 12 m. Detection radius about 4 m. Advantage microwave: -sensitive to minor motion -sensitive to radial movement -can be reflected by objects hence covering big detection area -resilient to heat source, smoke and air conditioner Disadvantage microwave: -penetrates walls, picks up motions outside the area -back wave detection, false trigger by motions at the back -can be false triggered by ventilation fans, water pipe, elevators etc.
