C Line Accessory 1250mm louver with prism.diff

PRODUCT DESCRIPTION

C Line Accessory 1250 mm Louvre with Prismatic Diffuser is an accessory designed for C Line luminaires. The combination of a louvre and a prismatic diffuser improves visual comfort by reducing glare while ensuring even light distribution. The accessory is intended for 1250 mm luminaires and is ideal for applications where lighting comfort and controlled light output are important. It is installed as an integrated part of the luminaire and provides a professional and functional appearance.

FUNCTIONALITY DESCRIPTION

Louvre with prismatic diffuser for C Line luminaires. The accessory is designed to reduce direct visibility of the light source and thereby limit glare. The prismatic diffuser contributes to uniform light distribution and enhanced visual comfort. The product improves light control and is particularly suitable for environments with high requirements for workplace lighting quality and visual comfort. The accessory is mounted directly onto compatible 1250 mm C Line luminaires.

MAINTENANCE

No maintenance requirements
