Cylinder 70

The Cylinder uses the possibilities created by new technology. The LED driver is mounted inside the luminaire body. This gives us a slim design combined with a powerful light output that can be easily adjusted in all directions to meet all needs. Cylinder can be tilted 90 degrees and rotated 350 degrees its own axis. To create further opportunities to "play" with light you can mount a diffuser on the luminaire, this can be ordered separately.
