Orion G2

230V 50Hz | IP65 | IK08

B

Orion is an energy-efficient industrial luminaire. With IP65 and IK08, it is suitable for use in tough environments both indoors and outdoors, in wet and dusty surroundings. The luminaire is equipped with a power switch where you can easily change the output via a DIP switch. Through-wiring for series installation and QuickConnect for easy installation. This product is also available with a microwave sensor with wireless communication between luminaires, using the Norlux Wireless Connect system for control.
